

Worked coding example: CODMAS

Source: structured RTL optimization

Conference paper (2026)
Coding based on reported full-text descriptions

RQ1 · Reported characteristics (10/10)

Perception & context acquisition	Reasoning & planning
Action execution	Tool & capability use
Memory & state management	Environment interaction
Feedback & reflection	Human-in-the-loop collaboration
Role & multi-agent coordination	Governance & traceability

All ten characteristics are reported in the source study.

RQ2 · System form

Primary:
Multi-Agent Collaboration
Secondary:
Domain-Tool-Augmented

RQ3 · Application domain

Domain: Software Engineering
Task: RTL optimization

RQ4 · Evaluation practices

Benchmark; case study;
experiment; ablation;
statistical analysis

Reported artifact availability: No

RQ5 · Architecture & evolution

Diagrams: system architecture;
workflow/flowchart

System evolution discussed: Yes
